fix your skin

Get improved colour, texture. Fresher, younger looking skin. It is true - I was against

all skin peels (medical, chemical, cosmetic, green

you name it) for

a very long time.

Sounds a bit

cliché but that

was until I

learned about

the new

innovative

process of

purification of ingredients called **chirality.**

I am so impressed with the science behind it I had a

peel myself. **Surprisingly, I found it amazing!** The

most dramatic results were on problematic skin and

acne, congestion, too dry or too oily skin.

Nurses, a doctor, experienced beauty

therapists and even an industry educator were

all are impressed! But don't take their word for it –

find out for yourself! **Book yourself for a peel** -

you won't regret it. Get **50%** off your first session.

Combine this with IPL fotofacial and reserve yourself amazing transformation.
